16 October 2024: Soil Carbon Baseline & Carbon Markets

With farm visit at Kingston Hill Farm

Want to understand how to measure the soil carbon on your farm? Uncertain what your soil carbon asset means for your customers, supply chain or how to integrate it into your farm business?

Then join us to learn about measuring Soil Carbon and demystify the Wild West of Carbon Markets with Tim Field and Chris Sworder of [Carbon Quester](#), a scientifically rigorous measurement service developed with Rothamstead Research. We will hear about the findings of the soil carbon baselining undertaken through the CSFF on some of our cluster's farms and have the opportunity to figure out how we can best get our soil carbon assets working for our businesses and the planet.

Venue: Kingston Hill Farm, Kingston Bagpuize, OX13 5HY
[///voters.takes.litigate](#) (drive through the farm to the farmhouse)

Programme

9am tea, coffee and networking

9.30am OCFC Update

Adam Bows, OCFC Facilitator, Freshwater Habitats Trust

- BASIS Training
- Upcoming events

9.45am Farm Soil Carbon Baseline and Carbon Markets

Tim Field and Chris Sworder, Carbon Quester.

- Why measure soil carbon
- Methods for measuring soil carbon
- Findings of the baselining undertaken on land parcels of 6 OCFC farmer members
- What to do with your data
- Soil carbon assets and markets

11.15am Soil carbon on a dairy farm - Kingston Hill Farm visit

David Christensen

Farm visit to consider practical opportunities for best managing and increasing soil carbon

12 noon Lunch

1pm close

About the OCFC

The [OCFC](#) are a group of farmers working together to access agri-environmental funding and share knowledge and expertise in order to improve the nature and ecosystem services such as clean water, carbon sequestered and fertile soil on our land. It is led by farmers for farmers, facilitated by [Freshwater Habitats Trust](#).
